What are solar panel mounting brackets?

Solar Panel Mounting Brackets by Fastensol are the backbone of sturdy and reliable solar installations. These brackets provide a secure and adaptable framework for attaching solar panels to various surfaces, be it rooftops or ground structures.

Why should I Choose fastensol solar panel mounting brackets?

Perfectly accompanying our solar panel fixings & solar panel mounting rails. Choosing a selection results in a full page refresh. Solar Panel Mounting Brackets by Fastensol are the backbone of sturdy and reliable solar installations.

How do solar panel brackets function?

Solar panel brackets function by being installed through fastening bolts or applying adhesive on the mounting rails onto a flat surface. Solar panels should be installed at an angle to allow the cells to receive as much sunlight as possible.

How many brackets do I need for a solar panel?

Great for use where space is at a premium. These brackets are suitable for most rigid aluminium framed solar panels and make a strong, secure and tidy installation on your boat or motorhome. For panels of up to 100 watts, only one set of these brackets are required. For panels over 100 watts we recommend using two sets of brackets for each panel.

How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

What are solar panel brackets made of?

Marine-Grade Materials Ready for the elements Our solar panel brackets are made of a T66 graded alloy, which we use for its incredible reliability, versatility and high strength-to-weight ratio. T66 is used in shipbuilding and offshore industry, so you will never have to worry about weather or the elements.
