Does Florida require a solar system to be certified?

Find answers to frequently asked Testing & Certification questions. The Laws of Florida (§#167;377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center (FSEC).

Does Florida have a community solar program?

Unfortunately, there is nothing in Florida law that allows for a community solar program. However, some of the state's IOUs have developed their own programs that are sort of like community solar. Duke Energy Florida offers two programs called "Shared Solar" and "Clean Energy Connection".

Does Florida have a solar policy?

Florida's solar policies have lagged behind other states: it has no renewable portfolio standard and does not allow power purchase agreements, two policies that have driven investments in solar in other states. However, due to utility investments in clean energy and other recent developments, significant growth is on the horizon.

Will a solar Bill change Florida's solar industry?

Sen. Jeff Brandes, R-St. Petersburg, said the bill would "fundamentally" change the industry and that lawmakers should take a more measured approach. "This bill is a sledgehammer of a bill on the solar industry of Florida," Brandes said.

What are FSEC standards?

These standards cover both solar thermal equipment and solar electric equipment. FSEC works closely with industry, the research and development community and other interested stakeholders to ensure that its Standards encourage the effective use of renewable energy resources and protect the consumers of the state of Florida.

Does Duke Energy Florida offer shared solar?

Duke Energy Florida offers two programs called "Shared Solar" and "Clean Energy Connection". The former costs much more than an average electric bill, but the latter should provide a small amount of savings over time. FPL offers the SolarTogether program, which it estimates will result in savings over time.

With support from representatives of consumers and businesses, the state Public Service Commission on Wednesday approved a settlement that will increase Duke Energy Florida's base electric rates and help lead to building more solar-energy facilities.

Florida's current net metering program is NEM 3.0. NEM 3.0 is governed by the Florida Public Service Commission (FPSC). The state net metering laws apply to investor-owned utilities, including Tampa Electric
