Check the Power Cables. 99% of wireless RV backup cameras are wired to the center running/reverse light on the back of the RV. That way the backup camera will only power on when you're in reverse, or when the lights are on and the battery won't be slowly drained.

Hi, my new 2021 TT was supposed to be pre-wired with plug and play backup camera. There were no wires coming through the hole in the mount. I finally fished up a white wire and a white with green stripe wire. The camera connector has two wires - black and red. Which wires would I hook to which? I hate to tow the TT all the way back to the ...
