

Generator exhaust wind shield

What is a generator exhaust?

A generator exhaust is a system designed to direct the fumes and output away from the engine or a diesel generator or petrol generator. It also helps to direct the heat away from the engine, preventing overheating. Exhausts ensure the proper and efficient working of your generator.

What is a generator flue system?

Our generator flue systems are a modular twin wall insulated exhaust system capable of pressures up to 5,000Pa and temperatures up to 600°C. Our generator systems are specifically designed to suit (diesel) engine applications such as e-generators, power gensets and uninterrupted power supply.

Do I need a generator exhaust extension?

Yes, depending on where your generator is located, you may need to install a generator exhaust extension. You can use a generator exhaust extension kit or purchase the parts individually. This application will remove the exhaust to a well-ventilated area for safety.

Why do generators require exhaust pipes?

Exhaust pipes are required for generators because they help to direct the heat away from the engine, preventing overheating and ensure the proper, efficient working of the generator. Hampshire Generators supply the best quality, stainless steel, semi rigid, gas tight, flexible exhaust pipes and clamps.

Can You overtighten a generator exhaust flex tube?

Do not overtighten as that can damage the exhaust pipe and/or extension flex tube. Extend through shelter wall. Some shelters come with pre-drilled holes for the exhaust, but you may need to create that opening. It should be level with the generator exhaust so the extension can easily pass through.

What if I can't find a generator exhaust?

For any enquiries with regards to a Generator exhaust please contact us via the phone if you are unable to find the product you are looking for.

Even though it looks like plastic, some silicone materials can withstand high heat applications. If you get the proper silicone hose, it can extend your generator's exhaust. But ensure that the ...

Elevate your generator's performance with 1-Exhaust's precision-engineered parts. From high-quality exhaust systems to durable components, our products ensure optimal efficiency and ...

Buy GenExhaust Universal generator exhaust system double layer wall attachment for 1" ID steel flex tubing: Generators & Portable Power - Amazon FREE DELIVERY possible on eligible ...

Generator exhaust wind shield

Boilers, CHP system & generator flues. Boiler systems are designed to generate heating and/or hot water for commercial and residential buildings and are often positioned in banks within a communal plant room. Combined heat and power ...

A Through-Wall Kit mounts in the wall of your building or enclosure and allows you to hook up your extension hose and vent your generator exhaust outside. Kits are available in longer and shorter versions for 1" and 1.5" hoses (both for ...
