

Generators to power your home

Can a generator power a whole house?

Large whole-house generators can power an entire average home, while smaller units provide power for key appliances. These are the best standby models from CR's tests.

Which home generator should I buy?

We researched the options and spoke with several experts to select the best home generators you can buy, including our best overall choice, the Briggs and Stratton PowerProtect 26kW Home Standby Generator, chosen for its versatility, power, and reliability.

Do I need a home generator?

The home generator you need depends on a variety of factors, including the type and wattage of the appliances you want to power. For example, if you want to power small appliances, such as a coffee maker or television, we recommend investing in a portable power station.

How do I choose a generator?

Choosing a generator takes some thought, though, because they vary in type, price, and size. Portable generators run the gamut from small recreational units that start at about \$450 and can power a single appliance at home (or go on a camping trip or tailgating) to large portable models that can power most of a home.

Can I use a portable generator for my home?

You can use a portable generator for your home for short-term and limited power needs. This dual-fuel whole house generator from WEN can be easily converted to operate on propane fuel with the twist of a dial and can produce up to 4,750 surge watts and 3,800 running watts when powered by gasoline.

Which Generac home generator should I buy?
