Building roofs, carports, and other flat areas can be ideal places to fit PV panels - creating a useful source of sustainable energy without the need to build a separate, dedicated power plant. Since the development of the first working solar cell in the mid-1950s, the use and availability of PV solar panels have increased exponentially.

We develop grid-tied (including "islandable" options), off-grid, and backup power projects with capacity from 100kW to 100MW and above, on a full ownership, shared savings, or power purchase agreement (PPA) basis.

Paid a substantial amount of deposit by Barclaycard for Solar Batteries on 29-9-23. Installation date of 29-11-23 was given after waiting 3 weeks. I contacted Green Leaf a week before installation was due to be told could not do that date. Another date was given. Received another excuse. A further date and another excuse.
