

Hebron Solar Power

Is solar power booming in Israel's West Bank settlements?

Credit: Gil Eliahu Solar electricity is booming in Israel's West Bank settlements, even as bureaucratic hurdles stall efforts to expand solar within the country. The Civil Administration, Israel's administrative body in the West Bank, is now moving forward with plans for 22 solar power plants in the West Bank.

Are solar projects coming to Israel and the West Bank?

While most of the solar initiatives in Israel and the West Bank are added to or integrated with existing buildings, the new projects are planned for undeveloped land. Most of the plans for solar power in the settlements are already far into the approval process.

How many solar power plants are in the West Bank?

The Civil Administration, Israel's administrative body in the West Bank, is now moving forward with plans for 22 solar power plants in the West Bank. One plan calls for creating a plant in the Jordan Valley with greater power generation than any of the existing solar plants in Israel.

Is solar power a good option for West Bank & Gaza?

Solar energy represents one of the few untapped supply options for West Bank and Gaza, and is becoming increasingly attractive as costs have dropped by 80 percent over the past 5 years driven by rapid technological change. Rooftop solar power represents a quick win and could provide a much-needed safety net for meeting basic electricity needs.

Why does Israel destroy solar power?

As it encourages solar energy in the settlements, Israel frequently destroys small solar facilities that the Palestinians have created to meet local needs, mostly in the South Hebron Hills and the Jordan Valley. These small systems usually generate enough power for lighting, refrigeration, and phone charging.

Can solar farms be developed in the West Bank?

In the West Bank, somewhat greater availability of land would also allow solar farms to be developed starting in Areas A and B. By far the largest potential, however, lies in Area C (60% of West Bank lands under Israeli military control), with its much larger tracts of desert land potentially suitable for solar generation.

As it encourages solar energy in the settlements, Israel frequently destroys small solar facilities that the Palestinians have created to meet local needs, mostly in the South Hebron Hills and the Jordan Valley. These small ...
