

Heckert solar

What is Heckert solar?

Heckert confirmed German and European-sourced solar production lines for the fab have been ordered and the factory will make monocrystalline, half-cell modules featuring nine busbars and 166mm wafers, for power output of 370 Wp.

Where is Heckert solar produced?

Heckert Solar produces PV modules in Chemnitz, eastern Germany, where it has an annual production capacity of around 400 MW. This content is protected by copyright and may not be reused.

Does Heckert solar offer a home storage system?

With the integrated, backup power capable home storage system Symphon-E, Heckert Solar offers its own storage system for the first time. The modular complete system impresses above all with its technical maturity and ready-for-future ability. It perfectly rounds off the existing product range of Heckert Solar.

Is Heckert solar a good brand?

Thanks to the good reputation that Heckert Solar and the multi-certified NeMo[®] modules enjoy in the PV industry, the company has now received the "Top Brand PV" seal in the Module Germany category for the fourth time in a row.

Are Heckert solar modules safe?

Solar modules meet the strictest requirements with around 60 quality and safety tests. Deputy Minister of Energy of South Brazil, Evandro Fontana, visits Heckert Solar in Chemnitz and discusses ways of opening up the market with the module manufacturer from Chemnitz.

Who are Heckert solar & wattkraft & interfloat?

Heckert Solar, Wattkraft and Interfloat are planning to invest around EUR2 billion (\$2.18 billion) in three different manufacturing facilities that will produce everything from polysilicon to solar modules. From pv magazine Germany
