

Halide Energy is a battery manufacturing company based in the Helsinki region of Finland, building copper flow battery storage solutions for grid-scale energy producers and industrial ...

Underground "lake" helps cool Helsinki as demand for district cooling rises Finland is in the midst of a record-breaking heat wave and Helsinki's subterranean reservoir helps cool off over 500 ...

Detailed info and reviews on 44 top Energy & Cleantech companies and startups in Finland in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

Already home to the world's largest heat pump, Helsinki is aiming to become carbon neutral by 2050, and the new pump alone is expected to provide up to 40% of the city's heating requirements when it goes online in around 2029.

Groq has opened its first European data centre in Helsinki, Finland, in collaboration with Equinix, expanding its global AI inference network. The new facility enhances access for European ...

With the ability to store 43 megawatt-hours of energy, the facility can sufficiently provide electricity to more than 35,000 households for a brief period. This pivotal project is more than just ...

Our solutions include flexible engine power plants, energy storage and optimisation technology, and services for the whole lifecycle of our installations. Our engines are future-proof and can ...

Summary Finland has taken a bold step in clean energy innovation by launching the world's first commercial sand battery. This thermal storage system uses heated grains to retain energy for ...

The Italian studio Carlo Ratti Associati is a number of the four winners of the global Helsinki Energy Challenge with the concept to create floating island-like seawater reservoirs that keep ...

As the global energy sector seeks efficient and sustainable storage solutions, Finland has introduced a game-changing concept--the sand battery. This innovative model is capturing ...

Helsinki's underground cooling system stores millions of litres of cold water to fight heatwaves. A massive reservoir beneath Esplanade Park helps supply chilled energy to homes and ...

With active initiatives in Germany, Finland, Italy and Croatia, Monsson is targeting over 1GWh of energy storage capacity across Europe, of which over 200MWh are planned for Sweden. ...

Helsinki energy storage

With the long-term ambition of becoming the most sustainable brand in the sector, they installed a PV-Storage project featuring POWEROAD's battery energy storage system at a store in ...

Potential Positives The completed energy storage facility represents Merus Power's largest project to date, highlighting its capability in delivering significant energy solutions. The facility's ...

The project is designed to optimize energy storage capabilities in Finland, addressing the growing demand for efficient renewable energy solutions. Fluence, recognized ...

Helsinki energy storage
