It's important to note that battery prices vary based on the type of equipment, product availability, and location. In fact, based on the NREL's breakdown, the actual equipment (battery, inverter, and balance of system) costs around \$7,400 -- 39% of the total cost of a standalone project -- while soft costs like supply chain costs, installation labor, taxes, permitting/inspection ...

A typical three-bedroom house in the UK will usually do well with an 8 kilowatt (kW) solar storage battery. Larger houses will need a battery with higher capacity, smaller ones will need a battery with less capacity. An installer will usually assess the energy usage of the home, and recommend a size of solar battery based on that.
