Some popular features for House Generators are low oil shutdown, automatic voltage regulation and lcd display. What's the price range for House Generators?

Can a generator power a whole house?

Large whole-house generators can power an entire average home, while smaller units provide power for key appliances. These are the best standby models from CR's tests.

Can a natural gas generator run a home?

Natural gas generators are permanently connected to a home's natural gas supply; they can operate as long as the gas supply remains uninterrupted. Natural gas and propane are generally considered cleaner-burning fuel sources and are also on-demand power sources. Air-cooled generators are the typical choice for backup residential power.

Can a portable generator power a home?

BF: You can use a portable generator to power a home, and for some people this may be a better solution than a standby generator because you can use the unit for other tasks.

Do I need a home generator?

The home generator you need depends on a variety of factors, including the type and wattage of the appliances you want to power. For example, if you want to power small appliances, such as a coffee maker or television, we recommend investing in a portable power station.

How much does a whole house generator cost?

But there are downsides. Whole-house generators cost more than portables. They can range in price from \$2,000 to \$7,000. By comparison, large portable generators that power a whole house start at around \$1,000. They're large in size and require a level concrete pad outside your home, a bit like a central air conditioning unit.

What is a whole home generator? Whole-home generators are designed to power an entire house and all its systems. They typically run on propane or natural gas and produce at least 3,000 to 30,000 watts of power. Some whole home generators are portable, so they can be taken on the road to power an off-grid cabin, RV or work site.
