

Homemade solar power pot

What is a DIY solar water fountain planter?

Creating a DIY solar water fountain planter is a fun and rewarding project that adds both beauty and tranquility to your outdoor space. It's a great way to get creative and make your very own DIY water feature that you'll enjoy for years to come.

How do you use a solar water pump?

Whether you prefer a gentle streaming water flow or a more dramatic spray, there's a different nozzle to make it happen. Once assembled, place the solar water pump into the small planter filled with water. Make sure it's positioned to receive enough sunlight to keep the fountain running.

How do you put a solar pump in a flower pot?

Because the pump floats in the flower pot, it often floats to the edge. When it does, the spray flows over the pot and rapidly drains the water. This is a great tip for keeping the solar pump centered in the pot. Insert galvanized wires into the foam floatations on the pump. Cut the wires to fit the distance from the pump to the sides of the pot.

Does a Solar Flower Pot fountain evaporate water?

The water will evaporate, especially on hot days. It's important that you check the water level in the top flower pot regularly and fill it as necessary. That's it, enjoy your new solar fountain! We also made this electrically powered Stacked Flower Pot Fountain for our backyard.

How to create an outdoor solar fountain?

When creating an outdoor solar fountain, pay attention to water splash radius, which will affect where you place the fountain and other furniture and decor items. Pin it! **IMPORTANT:** always keep the pump submerged in water when its running. When making adjustments, face the panel away from the sun until you can keep the pump submerged in water.

How do you use a solar fountain pump?

Now simply fill up your container right to the top with clean water. I have used the Aisitn Solar Fountain Pump 3.5W with Built-in 1500mAh Battery and if you want to know my thoughts on it then scroll down to my review of it. Simply take your solar powered fountain and unpackage it. Place it onto the surface of your water in the centre.
