

How to fill in the export tax number of photovoltaic bracket

Are export tariffs a good idea for solar PV?

For homes with solar photovoltaic (PV) panels, export tariffs like the SEG are a great way to bolster your energy bill savings. In this article, we'll explore how the SEG works, the benefits for solar PV system owners, and how it's shaping greener living in the UK.

What is a solar export tariff?

A solar export tariff pays you for all the electricity you send to the grid. At first, solar export tariffs were created in response to the government launching the Smart Export Guarantee (SEG) in 2020.

How do I sign up for a solar export tariff?

To sign up for a solar export tariff, you'll always need to have a smart meter, as well as documents that prove you own a certified, permitted solar installation. Some suppliers require you to own a specific brand's solar panels or battery - usually their own - while others only offer their highest rates to customers in certain geographical areas.

How do I qualify for a SEG tariff with a solar PV system?

Solar Photovoltaic (also known as Solar PV) Systems - Solar energy is one of the most popular ways to generate low-carbon electricity. To qualify for the SEG tariff with a solar PV system, there are no specific requirements regarding the type of photovoltaic system you have, as long as it generates less than 5MW of electricity.
