

Inside story of solar power generation fraud

Who pleaded guilty to a \$1 billion solar power fraud?

One other man was sentenced to three years in prison last year and three others pleaded guilty to criminal charges and await sentencing. A former energy executive in California who took part in a \$1-billion solar power fraud that bilked Warren Buffett's company and many others has been sentenced to six years in federal prison.

What happened to a former solar power executive?

SACRAMENTO, Calif. (AP) -- A former executive of a California solar power company was sentenced Tuesday to 6 1/2 years in prison and ordered to pay nearly \$620 million in restitution for his role in a \$1 billion fraud scheme, federal prosecutors said.

Was DC Solar a scam?

It was the largest criminal fraud scheme in the history of the district, which includes Sacramento and Fresno. According to prosecutors, from 2011 to 2018, DC Solar manufactured mobile solar generator units and, because they used solar energy, buyers could obtain federal tax credits. The reality was much different, authorities say.

Did DC Solar defraud the American people?

Over eight years, in at least 34 deals, DC Solar had defrauded more than a dozen corporate customers out of almost \$1 billion. Because those corporations had used the investment tax credit to deduct roughly that entire sum from their taxes, DC Solar had effectively robbed the American people.

What could the Carpoffs do if DC Solar went bankrupt?

The Carpoffs had options, even if they weren't ideal. They could close DC Solar. Or they could file for Chapter 11 bankruptcy, hoping that creditors would see enough worth saving to let the company reorganize. Or maybe there was another way.

Is DC Solar a Ponzi scheme?

The plan had many of the hallmarks of a classic Ponzi scheme, but with a twist. DC Solar wouldn't just defraud new buyers to pay earlier ones. By holding itself out as a legitimate solar company, it would give all of them--new and old--cover to drain millions of dollars of tax credits from the U.S. Treasury.

In a Ponzi scheme, such as the Carpoff solar generator case, the scammer promises high rates of return with little risk, then uses funds from new investors to pay supposed returns to early investors. A pump-and-dump ...
