

# Install solar panels at your home

Where can I install solar panels?

You can install them on your home, business premises, outbuilding, garden office, shed, workshop or garage- and even shepherd's huts for those who run a luxury holiday let facility. As long as the roof is strong enough and large enough to fit the units, you can install solar panels on whatever type of property you want to supply energy to.

Can I install solar panels myself?

You can install solar panels on your home yourself. You will need some electrical wiring experience, and we suggest that you also use a professional solar contractor or electrician to do the wiring and connection processes to ensure that you: Do not start an electrical fire that damages or destroys your home, solar array, and solar components.

How do I choose the best solar panel installation?

Address any necessary repairs or replacements before proceeding with the installation to prevent future issues. Factors like shading, roof angle, and direction also play a significant role in determining the best solar panel installation for your home. That's why we recommend installing solar panels after a thorough assessment of these factors.

How do I plan a solar panel installation?

Choose a supplier and establish if the installation will fall under Permitted Development or if full planning permission is required. 3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room. 4. Plan a day for installation. 5.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

How do you connect a solar panel to a house?

The conduit connects the solar panel or array to the house or battery backup system. You can dig the trench or run the pipes now or at the end of the process. It is better to do all of that now, run the wires through the conduit and leave them unattached until you are ready to connect them.
