

# Installation of photovoltaic panels on cement roofs

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

How do I install roof-integrated solar panel roof tiles?

Roof-integrated solar panel installation is a simple process with Marley SolarTile®; - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

Can solar panels be installed on a slate roof?

There's more work involved than with asphalt tiles, but solar panels work just fine on slate and concrete tile roofs. Clay, slate, and concrete tiles are usually removed and replaced during solar panel installation.

How do you install solar panels on a roof?

Your installer would temporarily remove the tiles, install the hooks underneath into the roof, then put the tile back over the mount, and rack the system from there. The second option is called a comp-out, where your installer will remove the tiles where you intend to put solar, then lay down composite shingle to install the array.

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Can you install solar panels on a flat roof?

Ballast systems are simply a weighted racking setup that holds solar panels in place. If you need to drill into your flat roof to install solar panels, don't worry- your solar installer will ensure that the holes they drill are as small as possible and sealed correctly to avoid roof damage or leaking. Can you install solar panels on wooden roofs?
