

# Is it okay to cover the photovoltaic panel

## How to remove it

Should you cover solar panels?

Many solar panel protective covers are meant to stop the absorption of solar energy, so the panels will no longer work effectively when the covers are in use. You should only cover your panels when they are not needed. Are There Benefits to Covering Solar Panels?

How to choose a solar panel cover?

Fit: solar panel covers should fit snugly around your solar panel. If it's too loose then it could blow off in strong winds and if it's too tight then it could crack the solar panel. Transparency: solar panel covers should be transparent so that they don't block out the sun. After all, that's what solar panels need to work!

When should I replace my solar panel protective cover?

You should replace your solar panel protective covers whenever they show signs of damage and, if possible, try and use a solar panel recycling company to dispose of your old cover. This will vary depending on the type of cover you have and the environment it's exposed to.

Do solar panels need a retractable cover?

Retractable solar panel covers can be helpful when your solar panels are not used for extended periods. You should protect your panels during the winter months or prolonged rain. Creating a barrier can prevent damage and prolong the lifespan of your solar panels. It will also stop algae growth.

Do solar panels need a reflective cover?

Reflective covers are helpful in hot climates. Solar panel protective covers can help keep your panels clean if you live in a dusty area. When dust, dirt, or debris accumulate on solar panels, they have trouble collecting as many sun rays as they need. Clear plastic covers can create a barrier and make cleaning your solar panels easier.
