

Is it okay to install solar panels on the roof

Can solar be installed on any roof?

Solar can be installed on almost any roof- here are some of the most commonly used roof materials that solar installers will encounter on the job: While solar panels can usually be safely and effectively installed on all roof materials, the exact installation processes may differ.

Can solar panels be installed on my property?

In order to have solar panels installed on your property, your roof needs to be strong and secure enough to hold the weight of the panels. Prior to an installation, all certified installers should evaluate the condition of your roof to see if the roof is structurally sound.

Can a flat roof hold solar panels?

This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels. Drilling into a flat roof can cause leaks, so an installer will usually ballast the panels instead - but these will add around 80kg per panel.

Should I replace my flat roof before installing solar panels?

The majority of flat roofs are made of traditional felt, which has a lifespan of approximately 15 years. So if your flat roof is over 10 years old, it would definitely be worth replacing it before installing solar panels. The same applies if you are planning to build an extension on your home and place solar panels on the flat roof.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

Are rooftop solar panels safe?

Being mounted on the roof, they are safely out of reach for vandalism or theft. Cons: Rooftop solar panels cannot be integrated with just any rooftop and require an unshaded, south-facing roof for optimal performance. Despite being economical, the upfront cost of installing rooftop solar panels is still high.
