

It is prohibited to install photovoltaic panels in commercial housing

Can I install solar equipment on commercial property without planning permission?

Join our team! The permitted development right of Class J allows you to install, alter or replace solar equipment on commercial property without planning permission. However this is subject to a 56 day prior approval. Read on for the limits and how to apply for the right to install solar equipment onto many commercial properties.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.
