What is a 25.2v battery for a hoverboard?

The purpose of a 25.2v lithium-ion battery for hoverboards is to power the electromagnetic motors that hold the rider steady while riding. 25.2v of power is the right amount to power two 250w motors, and should not be used as a replacement for a 36v hoverboard battery (which powers two 350w motors).

Why should you choose jetech hoverboard lithium-ion power battery solutions?

**BATTERY** The JETECH hoverboard lithium-ion power battery solutions use high quality imported lithium-ion battery cell with high discharging current rate, we develop the BMS by our own R&D team with high quality components to ensure our solutions are stable and safe to power your ebike and project.

Does jetech e490509 battery fit e4828090509?

Jetech E490509 Hoverboard battery. Jetech E4828090509 Hover Board battery. We've had a couple people order our battery, but have it not fit because they have a version that is smaller than the traditional 4AH we sell. Make sure to check before ordering or feel free to ask us and we'll let you know.

What is the standard voltage for a lithium ion battery?

The heat shrink is sometimes a different color, but that does not matter. The standard voltage is 36v and comes with 4.4Ah of charge (158wh). Some batteries may have 42v written on them too, but we find that this is usually only in relation to the charger and not what is written on the battery.
