

Site Assessments for PV Solar Projects are comprehensive evaluations that examine the unique characteristics and suitability of a site for solar energy generation. These assessments provide crucial data and insights that form the foundation of a successful solar project, ensuring optimal performance and maximum return on investment. Here's why a Site Assessment is the ...

Utility-Scale PV Solar Systems are game-changing solar installations designed to generate vast amounts of electricity to meet the energy demands of entire communities, cities, or even regions. These cutting-edge solar farms harness the boundless energy of the sun, delivering numerous benefits for both power providers and the environment alike.

Our dedicated engineer, Sergio, embarked on an exciting journey to commission JGH's second solar project in the picturesque landscape of Sao Tome. The scope of this project encompasses three systems tailored for an ITM UN. These systems collectively harness the power of sunlight to generate a remarkable 72.5 kWp of clean, renewable energy ...

Karen is Logistics Manager in JGH Group. She has many years experience within logistics, shipping, seafreight, airfreight, crosstrade, chartering, transport, customs procedures combined with strategic and operational purchasing. Karen joined JGH Group in 2013, previously she worked with a major Danish contracting company. She speaks Danish, English, German ...

Solar Home Systems (SHS) are innovative and cost-effective solutions that bring clean and sustainable electricity right to your doorstep. Designed to cater to the energy needs of individual households, SHS utilize the abundance of solar energy to provide reliable power in off-grid and underserved areas. Here's why SHS is the ideal choice for empowering your...

Yushen is an International Project Coordinator at the UN-LTA Department of JGH Group. She holds her Master Degree as Operations & Innovation Management from Aalborg University, Copenhagen Campus, and has worked in China as well as in Denmark, Portugal and Germany. Having both the supply chain background and the commercial skills and being a ...

Off-Grid PV Systems: Off-Grid PV Systems are self-sustaining solar installations designed to operate independently from the electrical grid. These systems are ideal for locations where grid connection is unavailable or impractical. Off-Grid PV Systems consist of solar panels, battery storage, charge controllers, and inverters. During sunny periods, solar panels generate ...

C& I Solar, short for Commercial & Industrial Solar, is a groundbreaking approach that harnesses the power of solar energy to meet the energy needs of businesses and industries. By integrating solar photovoltaic (PV)

Jgh solar

systems into commercial establishments and industrial facilities, C& I Solar offers a multitude of advantages, creating a win-win situation for both the environment...

Our Partnerships At JGH, we take immense pride in the fruitful collaborations we've nurtured over time. Our strong bonds with well-known international donors and funding organizations have empowered us to drive meaningful change worldwide. Additionally, we have forged robust relationships with world-class suppliers, ensuring that our customers receive the finest ...

JGH Group set forth on an ambitious journey in 2004, venturing into the world of solar panels. Since then, our Solar department has grown to such significance that we are now proudly recognized as JGH SOLAR - a testament to the ...

Financing a PV Solar Project can be a daunting task, but with our dedicated team of experts, and through our network of strategic partners, we simplify the process to match your unique financial needs and objectives. Our Financing Service offers a range of options, including Power Purchase Agreements (PPAs), Solar Leasing, and various financing models,...

At JGH Group, we've built a legacy of executing projects in some of the most remote and challenging locations on the planet. Our deep understanding of local conditions and ability to navigate the complexities these environments present set us apart in the competitive solar and tender business. Recently, Anders Dahl, our esteemed Head of Department,...

O& M in PV Solar Projects is an essential service that extends well beyond the initial commissioning. Our dedicated team of experts takes pride in providing meticulous care and attention to your solar system throughout its operational life, safeguarding your investment and optimizing energy generation. Here's what you can expect from our O& M services for PV...

At JGH Company, it is an absolute privilege to be part of a dynamic organization that works with both supply and solar panel solutions. Our commitment to a healthy work culture is deeply ingrained in our core values, and our dedication to fostering a healthy work environment is reflected in our flexible work arrangements, and opportunities for professional development.

In collaboration with the UNDP, and our local partners Commercial Management Solutions and Clay Energy, JGH is installing a 100 kWp facility in one of the country's many inland lagoons. The installation is a pilot project, to determine the feasibility of providing a larger clean energy package for the South Pacific nation. Álvaro visiting Tuvalu In July, Álvaro...

We are thrilled to introduce you to the Zimbabwe NatPharm Harare Medical Warehouse Solar Hybrid System project. A groundbreaking endeavor aimed at revolutionizing energy efficiency in the region. This ambitious project boasts an impressive size of 450 KWp and 1MWh, representing a significant investment in sustainable infrastructure. This initiative is ...

Nicolaj Dahl and Anders D. were delighted to participate in the recent AFSIA (Africa Solar Industry Association) event in Nairobi. This prestigious forum presented an exceptional opportunity to engage with the latest insights and discussions in the realm of renewable energy. It encompassed a diverse array of topics, including solar power, green ...

JGH Solar's Post. 152 followers. 3w. It all began in 1959 with a single focus. Today, 65 years on, we have grown into a versatile company with operations in infrastructure, machinery,...

We believe in sustainability JGH Group supports the Sustainable Development Goals as these are the blueprint to achieve a better and more sustainable future for all JGH Group wants to create solutions worldwide that support sustainability, fights poverty and help developing countries create successful infrastructure projects. At JGH we are driven by the profound belief...

PV Solar Mini-Grids are self-contained and decentralized solar energy systems designed to bring electricity to off-grid or underserved communities. By integrating solar photovoltaic (PV) technology with battery storage and smart grid management, these mini-grids deliver a reliable and sustainable power supply to homes, schools, businesses, and healthcare centers.
