

Greenhouse gas emissions resulting from human activity are causing the world's climate to change in ways that are dangerous to humans and the natural ecosystems we rely on. Strong and urgent action to reduce emissions ...

Carbon offset programmes aim to lower emissions by allowing high-income countries to meet part of their reduction targets by financing projects in low- and middle-income countries. Evidence from China--one of the world's largest ...

The paper, titled "Chemistry advances driving industrial carbon capture technologies," discusses how breakthroughs in chemistry are enabling more efficient and scalable carbon capture solutions for heavy industries such as oil ...

While ten years have passed since the Paris Agreement, global efforts to reduce emissions are still lacking, with recent UN projections indicating that the world is on course for a temperature rise of 3.1°C by 2100 - well ...

Our climate is changing because of greenhouse gases released into the atmosphere. Despite notable emission reductions over the last decades, the EU must transform production and consumption systems to achieve climate ...

DNVN - The shift of many large supermarkets in Europe from air transport to sea transport to reduce carbon emissions has forced foreign suppliers to innovate technology to meet low ...

Hydropower and wind energy dominate Sweden's renewable mix, while a robust carbon tax--one of the highest worldwide--has pushed businesses to innovate and reduce their carbon output. Cutting-edge city projects, like Stockholm's ...

Three-quarters of UK institutions reduced their carbon emissions last year as the total volume of CO₂ produced fell by the equivalent of flying around the world over 3,500 times. Figures from ...

Discover 5 practical circular economy strategies for SMEs to reduce their carbon footprint. Learn how to design for durability, implement PaaS, remanufacture, and enhance recycling for a ...

Once operational, the plant is projected to reduce carbon emissions by 140,000 tonnes per year. In addition to its environmental impact, the project is expected to create jobs, enhance ...

EU Member States have put in place 3,000 policies and measures to prevent the worst impacts of climate

Latvia reduced carbon emissions

change. National climate change mitigation strategies, policies and other accompanying measures are also in ...

is to reach net-zero emissions - where the total amount of emissions is balanced by activities to reduce the amount of carbon dioxide in the atmosphere - by 2050. Swipe. Select. Stay informed.

Latvia reduced carbon emissions
