

# Lithium battery checked in baggage

Can you put lithium batteries in checked luggage?

American Airlines: All lithium batteries and devices with them installed can only be in carry-on luggage.  
Delta: You can put a device with an installed lithium battery into your checked luggage if it is fully powered off. Spare lithium batteries are not allowed in checked luggage, however.

Can you carry a lithium battery on a plane?

Removed batteries must be carried in accordance with the provision for spare batteries. Checked Baggage  
Baggage equipped with lithium batteries are only allowed in checked baggage when containing lithium metal  
batteries with a lithium content not exceeding 0.3 grams, or lithium ion batteries with a Watt-hour rating not  
exceeding 2.7 Wh.

Can I put a battery in my checked luggage?

JetBlue: You can put a device with an installed lithium battery into your checked luggage if the device is fully  
powered off. Southwest: Southwest's policy is slightly unclear. It says spare batteries (up to 20 per passenger)  
and portable chargers are only allowed in carry-on luggage--not checked luggage.

Can you carry a battery on a plane?

Spare (uninstalled) lithium ion and lithium metal batteries, including power banks and cell phone battery  
charging cases, must be carried in carry-on baggage only. When a carry-on bag is checked at the gate or at  
planeside, all spare lithium batteries and power banks must be removed from the bag and kept with the  
passenger in the aircraft cabin.

Can lithium batteries cause a fire on a plane?

Smoke and fire incidents involving lithium batteries can be mitigated by the cabin crew and passengers inside  
the aircraft cabin. If carry-on baggage is checked at the gate or planeside, spare lithium batteries, electronic  
cigarettes, and vaping devices must be removed from the baggage and kept with the passenger in the aircraft  
cabin.

How many batteries can a passenger carry?

Quantity limits: None for most batteries -- but batteries must be for use by the passenger. Batteries carried for  
further sale or distribution (vendor samples, etc.) are prohibited. There is a limit of two spare batteries per  
person for the larger lithium ion batteries described above (101-160 watt hours per battery).

Baggage Policy for Smart Baggage with Lithium (Lithium-Ion) Batteries: Non-removable lithium batteries: ...  
If the smart baggage is checked in, the battery must be removed and carried as carry-on baggage. Electronic  
devices installed on the baggage must be powered off during the flight. If the smart baggage is carried onboard  
as a carry-on, it ...

## Lithium battery checked in baggage

Smart bags with integrated lithium batteries for the purpose of charging an external device or to provide power to the wheels of the bag with non-removable lithium batteries will not be accepted as cabin baggage or Check in baggage, unless the device contains only lithium batteries not exceeding 0.3g of lithium metal batteries or 2.7Wh of lithium ion batteries.

Smartbags with removable batteries under 2.7Wh or lithium metal content under 0.3g (eg. air tags) - can be carried as checked baggage or carry-on baggage. Smartbag with removable batteries exceeding 2.7Wh or lithium metal content exceeding 0.3g - can be carried as checked baggage if battery is removed (pop the battery in your carry-on ...

When preparing shipments containing lithium batteries, it is important to ensure the batteries are not in any way defective, damaged, or have the potential to produce a dangerous evolution of heat, fire or short circuit. When packaging lithium batteries for shipment, strong rigid outer packaging must be used.

Transport requirements in checked baggage: ... Power restriction for lithium batteries: max. 160 Wh or 8 g LC per device. Power restriction for non-spillable wet batteries: max. 100 Wh and 12 V per device. Note: Battery-powered portable medical devices require transport approval and medical clearance from the airline for use on board.

Spare lithium batteries (both lithium metal and lithium ion/polymer) are prohibited in checked baggage. Packing Tips for Batteries: If you're traveling with spare batteries in addition to the ones inside your devices, consider placing each battery in its own protective case, plastic bag, or package, or place tape across the battery's contacts ...

PSA: Never Pack Spare Lithium Batteries in Checked Baggage When Flying. US Bans Lithium-Ion Batteries in Cargo of Passenger Flights. TSA Battery Restrictions: Clearing Up Confusion on Flying with ...

Spare (uninstalled) lithium ion and lithium metal batteries, including power banks and cell phone battery charging cases, must be carried in carry-on baggage only. Lithium metal (non-rechargeable) batteries are limited to 2 grams of lithium per battery. Lithium ion (rechargeable) batteries are limited to a rating of 100 watt hours (Wh) per battery.

Power Banks, cell phone battery charging cases, rechargeable and non-rechargeable lithium batteries, cell phone batteries, laptop batteries, power banks, ... (e.g. carry-on or checked baggage) unless the damaged or recalled battery has been removed, or otherwise made safe. The airline may offer further public guidance on transporting individual ...

For example, spare lithium batteries for portable electronic devices and cigarette lighters must be removed from checked or gate-checked baggage and carried onboard the aircraft. Smartbags with batteries that can't be removed and hoverboards are not allowed in ...

## Lithium battery checked in baggage

Electronics and lithium batteries. You're allowed to bring 15 electronic devices with a lithium battery up to 100 Wh with you in your checked baggage. These devices need to be completely switched off. If you want to bring a device with a lithium ...

To help reduce the risk of these incidents, the FAA encourages fliers to check for recalls or damages to their devices, as they're more "likely to create sparks or generate a dangerous evolution of heat.". Passengers can also protect themselves and others by keeping electronics in a sleeve or case. If a device is squeezed too hard, it could damage the battery, ...

Any lithium ion battery containing more than 160-watt hours is prohibited from carriage on all passenger aircraft. Lithium ion batteries installed in a personal electronic device can be transported as checked or carry-on baggage. Lithium ion batteries not installed in a device (spares) must be in carry-on baggage and no more than two (2) spares ...

allowed in either checked or carry-on baggage. If they are not regulated, then they would be allowed. Smart bags can be checked once the battery is removed. Baggage location tracking devices (or "bag tags") powered by lithium batteries are allowed in checked bags if devices do not exceed 0.3 grams (lithium metal) or 2.7 watt hours (Lithium).

Medium lithium batteries and cells (100-160Wh) - extended life batteries for laptop computers and batteries used by audiovisual professionals; ... Battery-powered devices in checked baggage. If you must carry a battery-powered device in your checked baggage, such as a power tool like a nail gun or saw that isn't permitted in carry-on, be sure ...

Baggage equipped with a lithium battery(ies) When equipped with a lithium battery(ies) exceeding: - for lithium metal batteries, a lithium content of 0.3 grams; or ... When carried in checked baggage, each package must be marked as "DRY ICE" or "CARBON DIOXIDE, SOLID" and with the net weight of dry ice or an indication that the net weight is 2. ...

While lithium batteries should not be packed in checked baggage, other types of batteries should be safe. The TSA helpfully lists which batteries are permitted in checked luggage, including: . Dry cell alkaline batteries (i.e., AA, AAA, C, D, 9-volt, and button-sized cells)

If you're electronic device has lithium metal or lithium ion batteries (laptops, smartphones, tablets, etc.) it is allowed in checked baggage but should be carried in carry-on baggage when possible. When portable electronic ...

If you're electronic device has lithium metal or lithium ion batteries (laptops, smartphones, tablets, etc.) it is allowed in checked baggage but should be carried in carry-on baggage when possible. When portable electronic devices powered by lithium batteries are in checked baggage, they must: Be completely powered off

## Lithium battery checked in baggage

Spare (uninstalled) lithium ion and lithium metal batteries, including power banks and cell phone battery charging cases, must be carried in carry-on baggage only. With airline approval, passengers may also carry up to two spare larger lithium ion batteries (101-160 Wh) or lithium metal batteries (2-8 grams).

For companies that only ship lithium batteries, or products packaged with or containing lithium batteries it is more appropriate to take the Shipping Lithium Batteries by Air course to get a comprehensive look at how to ship lithium batteries and how to properly meet the requirements set out in the IATA Dangerous Goods Regulations .

Lithium metal batteries containing up to 2 grams of lithium (e.g. cameras) and lithium ion batteries up to 100 watt-hours (e.g. mobile phones and laptops) may be transported as checked and carry-on baggage (carry-on is recommended) ...

Completely turn off all devices with lithium-ion batteries that are in checked bags. Prevent short circuits by protecting battery terminals. This can be done with the manufacturer's packaging or by covering with tape and placing in a separate bag. Store spare batteries in carry-on bags. Lithium-ion batteries can't exceed 100 watt hours ...

All other battery restrictions still apply e.g. no more than two spare lithium batteries exceeding 100Wh and up to 160Wh, are permitted and forms part of the total carried. A combination of batteries may be carried e.g. 10 x 98Wh lithium ion + 2 x 138Wh lithium ion + 2 x 12V and 98Wh non-spillable + 6 x alkaline.

Lithium metal batteries containing up to 2 grams of lithium (e.g. cameras) and lithium ion batteries up to 100 watt-hours (e.g. mobile phones and laptops) may be transported as checked and carry-on baggage (carry-on is recommended) when installed in a portable device

Where the item is equipped with a removable lithium battery and the battery Watt-hour (Wh) rating is below 160: permitted as carry-on or checked baggage provided the battery is removed. If the watt-hour rating (Wh) exceeds 100, prior approval from Qatar Airways is required.
