On to your golf cart. Battery life is crucial here, and LiFePO₄ batteries are the supreme option. Lithium batteries have the longest lifespan of all deep-cycle batteries, lasting 3,000-5,000 partial cycles. As we covered earlier, lead acid battery options don't even scratch the surface of that kind of longevity.

These batteries are 30% lighter in weight than flooded cell batteries and have a good usable capacity of between 80-100%. Lithium-ion batteries also have the fastest recharge rate of these three deep cycle options and have an extremely long cycle life. A lithium-ion battery also offers a better and more constant voltage over any rate of discharge.
