

Livescope lithium battery setup

Do you run a lithium battery with a Livescope?

And yes, as Lowe Rider says ... use a deep cycle battery. My buddy that has a Livescope has his on a dedicated battery (just because it does pull so much juice) !! You'll be deep cycling the battery, so... deep cycle it is. A long day's fishing with LS+head is about 40 Ah! I run a 50 Ah lithium, lasts almost 2 whole days with 102sv +GLS10.

What battery is best for Livescope?

For these big power-hungry (and feature rich) models we recommend the Dakota Lithium 18 amp hour (Ah) battery or the Dakota Lithium 23 amp hour (Ah) battery : Garmin Panoptix Livescope.

Does Livescope need a battery?

Yes, LiveScope needs its own battery, but you can use the same battery for the black box as for the Garmin head unit that it's plugged into. However, many anglers prefer to use separate batteries for the black box and for the display unit, as that gives them a longer battery run time in total. How much does LiveScope cost?

Does a Garmin Livescope have a lithium battery?

"Garmin was the first to deliver live-scanning sonar technology to ice anglers, transforming the way they pinpoint and follow schools of fish below the ice," said Dan Bartel, Garmin vice president of global consumer sales. "Now with a lithium battery, powering your LiveScope has never been easier.

Does Livescope run all day?

According to some users, Livescope can run continuously for the entire day. One user even has three units at the bow and two at the console, and has cut 150-160 pounds out of his boat by using these adapters. The user mentioned has a 68ah AGM battery for their 93sv/Livescope system.

How do I use the Livescope Plus system?

The Garmin LVS34 Transducer for LiveScope Systems offers Forward Mode for a front and slight down image, Down mode for a picture of what is directly below your boat, and Perspective mode for a top-down view. You can select between these modes using the included mounts.
