

Maine solar energy

Is solar power available in Maine?

Solar power is available in Maine. It is a clean, pollution-free, renewable energy source that is available statewide. Maine has tremendous potential for solar power, but in the past decade we have fallen behind while other states in the region (and places around the world) have enjoyed the environmental and economic benefits of solar.

Why should you buy a solar system in Maine?

Most Maine solar buyers will stay connected to the power grid as a backup energy source. This connection allows solar owners to sell the extra electricity that their systems produce back to their utility companies as a part of Maine's Net Energy Billing program.

Does Maine have a 'community solar' program?

Maine's solar power output has surged in two years. 'Community solar' projects play a big part. ReVision Energy's Derek Turnbull, left, and Nick Sampson at a new "community solar" farm in Acton. A mid-sized project in York County that's part of the state's new "community solar" program is just about to go live.

Can using solar energy save money in Maine?

Using solar energy can save money for everybody in Maine as increasing the amount of solar energy delivered locally has this effect. However, in 2017, Maine's Public Utilities Commission (PUC) adopted rule changes that have resulted in additional costs for all electricity customers in Maine, including those who do not use solar energy.

Does Efficiency Maine offer rebates for solar projects?

Efficiency Maine does not currently offer rebates for solar projects. Click here for a registry of independent solar installers. Solar electric or photovoltaic (PV) systems convert sunlight into electricity. The amount of power generated by a PV system depends on the size of the system and how much sunlight reaches it.

What happened to solar in Maine in 2019?

In 2019, the Maine Legislature and Governor Janet Mills acted to accelerate solar jobs and increase the amount of solar for Maine residents, businesses, and towns. Several pieces of legislation were enacted with leadership from Republicans and Democrats.

Maine's renewable portfolio standard (RPS) establishes the portion of electricity sold in the state that must be supplied by renewable energy resources. In 2019, Governor Mills signed legislation that increased Maine's RPS to 80 percent by 2030 and set a goal of 100 percent by 2050. In addition, that legislation required the Maine Public Utilities Commission (PUC) to procure long ...
