

Manual drilling holes on the ground of photovoltaic bracket

How do you drill a hole in a mounting bracket?

The slots on the mounting bracket can accommodate various stud spacings from 12 in. (305 mm) to 16 in. (406 mm). Mark the drill hole positions with the mounting bracket. Drill four, 5/16 in. (48 mm) diameter holes, making sure the holes are deeper than 2 in. (50 mm).

How do you install a wall mount bracket?

Mark the drill hole positions with the mounting bracket. Drill four, 5/16 in. (48 mm) diameter holes, making sure the holes are deeper than 2 in. (50 mm). Insert the expansion bolts into the holes and tighten. and affix the wall-mount bracket onto the wall.

How to install a PV inverter?

step 1: Rotate all the DC switches to "OFF" position. step 2: Check the cable connection of the PV string for polarity correctness and ensure that the open circuit voltage in any case does not exceed the inverter input limit of 1,100V. step 3: Connect the PV connectors to corresponding terminals until there is an audible click.

How to install a PV connector?

5 Electrical Connection User Manual 5.7.3 Installing PV Connector step 1 Ensure that the DC switch is in "OFF" position. Otherwise, manually turn it to "OFF". step 2 Check the cable connection of the PV string for polarity correctness and ensure that the open circuit voltage in any case does not exceed the inverter input limit of 1,100 V.

What is a typical grounding hole?

The grounding hole on the frame is marked with typical grounding symbol () according to IEC 61730-1 standard, which can only be used for grounding, not for module installation. Grounding between modules shall be confirmed by qualified electricians and grounding devices shall be manufactured by qualified electric manufacturer.

How to protect a PV module if a parallel connection is more than 2?

If quantity of parallel connection is more than 2, there must be an overcurrent protection device on each string of module. PV Module's junction boxes with the IP67 protective level, can provide the safety protection for cable and wiring connection, also for contact protection of non-insulating electric parts.
