

Magellan Power seeks \$15 million in external investment to scale up production of its commercial energy storage systems and residential batteries while expanding operations across Western ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (the OBBB), which significantly rolls back many of the core tax incentives that clean energy projects have relied ...

Founded in 2012 by young Somali entrepreneurs, the company introduced modern solar energy solutions to Mogadishu and has since equipped several of the city's most prominent landmarks ...

Renewable energy storage specialist Apatura said it had received planning consent to build a new grid-scale 560-megawatt battery energy storage system (BESS) near Clydebank in West ...

From the perspective of PCB design and manufacturing, this article discusses the key elements in energy storage PCB design and manufacturing, combined with PCB design specifications to ...

But the energy is primarily self-consumed, meaning many manufacturing sites draw power directly and don't gain more energy independence through comprehensive energy storage or hybrid energy solutions. Why is that the ...

Energy Storage Solutions for Manufacturing Facilities In the industrial landscape, the quest for operational efficiency has become more essential than ever. Operations Directors in industrial ...

Energy storage technology has advanced by leaps and bounds in recent years, offering a range of benefits for manufacturing facilities. From reducing energy costs and improving grid stability to ...

Lyten will take full ownership of Northvolt Dwa ESS, Europe's largest energy storage systems manufacturing operation, located in Gdansk, Poland. Lyten intends to immediately restart ...

Making 24/7 renewables a reality through Thermal Energy Storage. Harvest Thermal develops a control system for home use that integrates heating, hot water, and cooling with thermal storage. Cheesecake Energy is ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to ...

According to a latest report from market intelligence firm Clean Energy Associates (CEA), the U.S. energy

storage system (ESS) battery manufacturing capacity is facing severe challenges. As ...

Driven by the "Dual Carbon" goals, TCL--a benchmark of intelligent manufacturing in China--has taken the lead in breaking new ground. The 10MW/20MWh energy storage project, jointly ...

Moment Energy announced that its Metro Vancouver, BC manufacturing hub is now in full-scale production, delivering its flagship battery energy storage systems (BESS) to serve a growing ...

The 500Ah+ large energy storage battery cell technology is rapidly emerging, demanding significantly higher efficiency from thermal management systems. Liquid cooling plate design ...

Autowell Intelligent Equipment (ATW) has officially received CE certification from TÜV Rheinland for its energy storage production line, following a rigorous, full-process audit, the milestone affirming its commitment to ...

DuBOIS -- Penn State DuBois and Metaltech Inc., a local leader in powdered metal manufacturing, are teaming up on a new research initiative focused on next-generation energy ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (H.R. 1 119th Congress) (OBBBA), which significantly changes the clean energy tax credit landscape established by the Biden administration pursuant to the ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

SLB, a global leader in energy technology, has been awarded a key contract to support carbon storage site development in the North Sea by the Northern Endurance Partnership (NEP). This ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

After three months of tailored support from EnergyLab and New Energy Nexus, these founders now stand poised to accelerate the country's battery manufacturing capabilities - with ...

Energy storage and all other types of power projects (i.e., other than solar and wind) have until the end of 2033 to start construction to qualify for technology-neutral tax credits at the full rate. ...
