

Meridian energy solar buyback rate

Does Meridian Energy buy back solar?

Meridian and Powershop have great solar buy-back rates and between them nearly 8,000 residential customers generating electricity through their own solar panels. These customers on-sell around 25 gigawatt hours of electricity to Meridian Energy each year, which we resell into the grid. We get it.

Are meridian & contact energy reducing buyback rates?

In November, both Meridian and Contact Energy announced they were cutting their buyback rates for new customers by up to 50 percent. This week, Meridian told its solar customers the same cuts would apply. From July the 1st, the rates will be seven cents per kilowatt hour in the summer, and 10 cents in the winter.

What are solar power buy-back rates?

Solar power buy-back rates are the price per unit at which energy retailers pay for excess/exported solar power from homes or businesses. The buy-back price ranges between 7¢ to 17¢ per kWh for exported solar power. Up to 40¢ is offered for exported stored battery capacity. View the New Zealand solar buy-back price list below.

Why should I Choose meridian for solar?

Why choose Meridian for solar? You're guaranteed a buy-back rate of 17¢/kWh for five years on our Solar Plan, giving you peace of mind in times of rising cost of living. We also provide buyer-created tax invoices, a real time-saving benefit for GST-registered customers. Check your bill. Track your power. Add your meter readings.

Does Mercury buy back solar power?

Mercury will buy back your extra solar generation at 18¢ per kWh (excluding GST). For more information, [click here](#). Nova Energy states that it can pay for excess power exported by residential customers with solar panels rated to generate up to 10kW. The buy-back power charges are clearly shown on their bills.

Does a good solar buy-back price matter?

For example, a home that uses 50% of the solar power in its home and 50% of its power will be exported will need to focus on getting a good solar buy-back rate. If the home is able to use closer to 80% of the power generated then a good buy-back price won't matter as much.

Here's how our buyback works: We'll credit your excess solar energy at the Texas wholesale rate. This means that whatever the wholesale rate is at the time you export, is the price we pay you for your excess solar energy which will be applied as a cash credit.

Finding the best solar buy-back rate is as easy as checking our list of what retailers are paying. And with a difference of 10¢ per kWh between the best and worst price, it literally pays to check before signing up.
