JNTech is a research and development manufacturing company established in 2006 and a global leader in new energy solutions. The company was honored to be invited to participate in the ...

However, Oregon's new laws are the first to establish a regulatory framework for microgrids, which could provide new opportunities for development, especially in transmission-constrained ...

These challenges have catalyzed extensive research and development efforts, particularly in distributed generation (DG) technologies, over the past few decades [4]. A major advancement ...

In this study, different methods of primary control for current and voltage regulation, secondary control for error-correction in voltage and current, power sharing in a microgrid and microgrid ...

As a result, stability analysis and enhancement have become critical aspects of microgrid development, especially as DERs play a growing role in the transition toward sustainable and ...

It's still early days on what already feels like a long road, but the movement to create a multi-customer microgrid utility for Cuyahoga County, Ohio, moved a huge step forward earlier this ...

This paper presents a multi-criteria decision-making (MCDM) approach for optimizing a microgrid system to achieve Plus-Energy Building (PEB) performance at the University of Coimbra's ...

IEC 62898 (DER) (AC), ...

In 2022, we completed the first completely renewable, front-of-the-meter, multi-customer microgrid in California. This groundbreaking system at the Redwood Coast Airport is the model project for PG& E's Community Microgrid ...

The Resilient Minneapolis Project (RMP) is a collaborative effort between the City of Minneapolis and local utilities to enhance service in low-income communities by implementing microgrid ...

By integrating power electronics, control theory, and stability analysis, this chapter provides a practical framework for understanding and improving microgrid operation, offering valuable ...

A comparative analysis of the classical PI and sliding mode control-based designs is conducted under various grid conditions, such as cold ironing mode of the shipboard microgrid, and load variations, considering both the AC and DC loads.

The microgrid energy storage market is experiencing robust growth, driven by the increasing need for reliable and resilient power systems, particularly in remote areas and regions with unstable grids. The market's expansion is fueled by ...

The evolution of throttle body technology in microgrid operations has been a critical aspect of power system control and management. Initially developed for automotive applications, throttle ...

The BIA grant -- \$3.55 million -- was funded by the Inflation Reduction Act, for installation of the solar-powered microgrid, stakeholder engagement, planning and workforce development. ...

Key players like ABB-Hitachi, Schneider Electric, and Siemens are actively investing in research and development to enhance the efficiency, scalability, and cost-effectiveness of intelligent ...

A new partnership hopes to lessen the environmental impact of data centers and recycle EV batteries, too. AI data center development company Crusoe Energy Systems is working with recycling company Redwood Energy to "develop a ...

- **Masdar City, UAE**: This innovative microgrid project utilizes a mix of renewable energy sources and smart technologies, showcasing the potential for sustainable urban development. ...
