Nebraska Public Power District (NPPD) has reached Phase 2 of a feasibility study assessing preliminary siting options for advanced nuclear reactors in Nebraska. In 2022, the Nebraska Legislature allocated \$1 million to the Nebraska Department of Economic Development (DED) to fund the feasibility study. DED subsequently awarded the funds to NPPD ...

In Nebraska, public power offers reliable, efficient, friendly service. Nebraska's utilities are governed by Nebraskans. As a result of a law passed by the U.S. Congress in 1992, change is likely to come to our public power system. The Federal Energy Policy Act established the framework for electric competition at the wholesale level and ...

Nebraska is an "all public power state." We do not have any investor-owned utilities providing electric service to consumers in the state. Nebraska's electric consumers receive their power from public power districts, electric cooperatives, municipal electric systems, joint action agencies or a combination of the above. Of the thirty-five members of the Nebraska Rural Electric ...

Nebraska Public Power District is beginning the process of studying sites that could have the potential to host advanced small modular nuclear reactors, it said on Jan. 13. Under Nebraska legislative bill 1014, the State of Nebraska allocated \$1 million of American Rescue Plan Act funding to complete a siting study for small modular reactors.

Nebraska Public Power District announced earlier this month its goal of being decarbonized by 2050. The decision aligns NPPD with the state's other major electrical providers - Lincoln Electric System and Omaha Public Power District - in their net-zero goals. LES and OPPD also made similar plans to achieve net-zero emissions by 2040 and ...
