

New Rural Solar Power Generation Scam

Is going solar a scam?

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Are solar panels a scam or a cold call?

Here are the cold calls and potential scams to avoid. More than a third of solar PV panel owners in our recent survey told us they have been cold called about their panels in the past five years. Most cold callers were trying to sell them something unnecessary, but a few owners were told something completely untrue.

Will a 'restricting solar panels on farmland' help food security?

A rumoured plan from the Department for Environment, Food and Rural Affairs to dramatically restrict solar panels on farmland in the UK will not help food security- which is threatened far more by climate change - let alone energy security, and is at odds with the Government's Net Zero Strategy.

Is misinformation turning rural landowners unfairly against renewables?

But misinformation spread by groups like Citizens for Responsible Solar is turning rural landowners unfairly against renewables, says Skyler Zunk, an Interior Department official under President Donald Trump and chief executive of Energy Right, a conservative-leaning nonprofit that supports solar projects that preserve ecosystems.

Should solar power be integrated with rural landscapes?

Interestingly, rural organisations such as the National Farmers' Union and the Country Land Business Association have in recent years been supportive of integrating solar power generation with rural landscapes. They view it as a sound diversification strategy which provides farmers with a reliable source of income.

These scams start with an unexpected phone call, message on social, or even an in-person visit. The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try ...

Despite popular misconceptions, renewable energy is not relatively new in the Filipino scene. Historically, the Philippines has been among the first in Asia to adopt large ...

New Rural Solar Power Generation Scam
