

New types of wind turbines

A new peer-reviewed study from researchers at Poland's Adam Mickiewicz University has found no evidence that wind turbine noise causes mental harm, putting to rest a persistent and ...

Despite cancer's wide-reaching impact, many people do not fully understand the different types of cancers. We spoke to an expert to learn more about the specific type of cancer that impacted ...

An overview of the world-wide wind turbine airfoil families developed since 1990's is presented, such as the S series, the DU series, the Risø series, and the FFA series. The design and wind-tunnel tests of the Northwestern ...

Wind turbines and windmills may look similar, and many people confuse the two terms, but in fact, they are two very different things. A wind turbine converts wind energy directly into electricity through rotating blades ...

Renewable energy, usable energy derived from replenishable sources such as the Sun (solar energy), wind (wind power), rivers (hydroelectric power), hot springs (geothermal energy), tides (tidal power), and biomass ...

Wind power is an important part of renewable energy generation in Australia, accounting for over 35% of all renewable energy generation in the country. This energy generation method, which involves capturing the power ...

New bladeless wind turbine generates clean, quiet, bird-safe power New bladeless wind turbine uses vibration instead of blades, offering quieter, safer, and greener energy for homes and cities.

Meet Shigeto and Atsushi that work here We are now developing new type of wind turbine, Magnus Vertical Axis Wind Turbine (VAWT). Magnus VAWT can continue its generation in ...

Researchers have discovered that two tiny, counter-rotating wind turbines working in tandem can generate 37% more power than a single turbine alone. This finding could unlock more efficient...

In this article, we'll cover the basics of wind turbines, how they work, and why they're becoming such a big deal. You'll learn about the different types of wind turbines, their benefits, and some ...

Insights from a new study could help unlock the full potential of a developing form of smaller-scale wind power generation, researchers say. Engineers from the University of Glasgow have used ...

New types of wind turbines

The jacket-type wind turbine comprises a wind power generation system, a tower, a jacket, a transition section, and pile legs, arranged from top to bottom. The wind power ...

Wind Turbines: Wind turbines utilize the kinetic energy of the wind and convert it into electricity. There are two types of wind turbines: horizontal-axis wind turbines (HAWTs) and vertical-axis wind turbines (VAWTs).

Optimization of wind energy utilization is one of the prime concerns in renewable energy projects. This paper deals with DFIG systems" stability, an integral part of wind turbine systems. A new ...
