

North solar screen vs solar screen company

What does North Solar Screen LLC do?

North Solar Screen, LLC sells indoor and outdoor, manual or motorized shades. The business is involved in designing custom shade systems such as transparent, light filtering, and room darkening.

Are solar screens worth it?

Most solar screens are attached to your windows on the outside, but if necessary, can also be attached to the window on the inside. To decide whether or not a solar screen is going to be worth it for your home, let's look at the pros and cons: Do Solar Screens Actually Work? Yes!

Why should you choose solar screens for your home?

By blocking the direct sunlight from shining through your windows, solar shades control the glare from shiny and glossy surfaces in your home. 4. Solar Screens Provide Daytime Privacy

Do solar screens really work?

Solar screens will allow complete external visibility while reducing glare from the sun. Consider looking out the window while wearing tinted sunglasses. This is the general vision quality that our screens allow. It's similar to looking through a regular window screen but darker. Will my solar screens pay for themselves? Yes!

Should solar screens be installed on the exterior of a window?

This is why we recommend installing solar screens on the exterior of the window...so you can maximize their effectiveness. With window tint, there is no option to install it on the exterior of a window with an air gap between the tint and glass. Therefore, solar screens are much more effective at blocking heat and UV rays from the sun.

What is a solar screen?

Here's What You Need to Know) Solar screens are composed of a unique window screen mesh (often a polyester weave), and it is also sometimes made with the improved durability of a PVC coating. Usually, you'll find these screens installed outside of your windows to block them out.

Solar Screens vs Solar Film. Solar heat gain through windows accounts for up to 1/3 of the cooling costs in your home and office according to the U.S. Department of Energy. Both window film and solar screens are effective solutions to issues like heat, glare, and fading... but we prefer window film - why? 1. Window Tints Can Last a Lifetime
