What happened to Northern Arizona wind & sun?

We have big news! Northern Arizona Wind and Sun is now officially NAZ Solar-Electric. Nothing has changed within the company. We haven't been bought and our operations remain the same. After more than 40 years in the business, we thought a refresh was in order.

Is Northern Arizona windy?

Springtime is upon us, and that means Northern Arizona is about to become an extremely windy place. Now, while you don't have to worry too much about being carried off by a rogue breeze, other effects of the wind such as dust storms and road closures might become an obstacle.

What causes wind in Northern Arizona?

As these two fronts begin to meet, a pressure gradient develops, creating the perfect environment for consistent and powerful winds. Increased heat from the sun also contributes to turbulence, and as warmer air rises, colder and more powerful currents are forced closer to the ground. 2.) What are the windiest areas in Northern Arizona?

Is Northern Arizona facing high winds?

Northern Arizona facing gusty conditions up to 70 mph. Here's what to know Northern Arizona was facing high winds on Saturday, with gusts up to 70 mph reported on Interstate 40 near Winslow, officials said. The National Weather Service in Flagstaff said high winds were expected through Sunday. Most areas were expected to see 40 to 55 mph gusts.

The size of a solar electric system depends on the amount of power that is required (watts), the amount of time it is used (hours) and the amount of energy available from the sun and wind in a particular area (sun-hours per day & wind average MPH). The user has control of the first two variables, while the third depends on the location.

In much of the United States, wind speeds are low in the summer when the sun shines brightest and longest. The wind is strong in the winter when less sunlight is available. Because the peak operating times for wind and solar systems occur at different times of the day and year, hybrid systems are more likely to produce power when you need it.

Northern Arizona Wind & Sun is a family owned business. We started up in the solar electric business officially in 1979 when the company was formed. Our family has been in Arizona since 1885, aside from a few excursions overseas in WW2 and Vietnam. Most of that has been in the Grand Canyon area, and many of the old timers contributed to the ...
