Decommissioning of Nuclear Facilities. On this page: What We Regulate; How We Regulate; What We Regulate The nuclear regulatory activities of the U.S. Nuclear Regulatory Commission (NRC) include decommissioning nuclear facilities, which means safely removing a facility or site from service and reducing residual radioactivity to a level that permits either of ...

The Energy Reorganization Act of 1974 created the Nuclear Regulatory Commission; it began operations on January 19, 1975. (Watch video: Moments in NRC History: Founding of the NRC) The NRC (like the AEC before it) focused its attention on several broad issues that were essential to protecting public health and safety. Radiation Protection

Atomic energy means all forms of energy released in the course ... The Nuclear Regulatory Commission has submitted the information collection requirements ... a specific license issued under this part incorporates by reference information on the design of a spent fuel storage cask for which NRC approval pursuant to subpart L of this part has ...

The U.S. Nuclear Regulatory Commission. ... Under certain conditions (as allowed by the Atomic Energy Act), the NRC enters into agreements with State governors. Those agreements authorize individual States to regulate the use of specific radioactive materials within their borders. ... and storage of high-level radioactive waste. Currently, 39 ...

Similarly, the website provides a diagram of the Canadian Hydrogen Value Chain (HVC), outlining the process from procurement to production and consumption of hydrogen fuel. The references are aggregated by their relevance to specific stages of the process, certain HVC components and/or certain Energy Storage (ES) technologies.

The cases, U.S. Nuclear Regulatory Commission et al. v. State of Texas et al. and Interim Storage Partners LLC v. Texas et al., (collectively, NRC v. Texas), are both appeals from an August 2023 ...

While there are other public and not-for-profit organizations that conduct similar R& D in the area of energy storage, bioenergy and mining, the NRC facilities and expertise make it unique in Canada. EME is aligned with federal government priorities related to the environment, evidenced from its new vision focused on clean technology and ...

Nuclear Energy Institute, 1201 F Street N. W., Suite 1100, Washington D.C. (202.739.8000) ... We would like to especially thank the U.S. Nuclear Regulatory Commission (NRC) ... DSS Dry Storage System DOE U.S. Department of Energy EPRI Electric Power Research Institute

## Nrc energy storage

Whether the Atomic Energy Act of 1954, 42 U.S.C. 2011 et seq., and the Nuclear Waste Policy Act of 1982, 42 ... Respondents also include Interim Storage Partners, LLC, an intervenor-respondent in the court of appeals. ... Nuclear Regulatory Commission and the United States of America, respectfully petitions for a writ of certiorari ...

Division of Fuel Management. Director: Shana Helton Deputy Director: Cinthya Rom#225;n Deputy Director: Kimyata Morgan-Butler. The Division of Fuel Management (DFM) has regulatory responsibility for the front- and back-ends of the nuclear fuel cycle, including uranium conversion, enrichment, deconversion, and fuel manufacturing; spent fuel storage and ...

The U.S. Nuclear Regulatory Commission (NRC) is currently engaged in pre-application activities interactions for the Natrium reactor. The Natrium design combines features from the previous GEH PRISM and TerraPower Traveling Wave designs. The proposed Natrium reactor is a 345 MWe pool type sodium fast reactor using HALEU metal fuel.

The following tables present a list of documents that the U.S. Nuclear Regulatory Commission (NRC) issued in connection with the Continued Storage rulemaking (formerly Waste Confidence). ... NRC Press Release (14-055): NRC Approves Final Rule on Spent Storage and Ends Suspension of Final Licensing Actions for Nuclear Plants and Renewals: 10/09 ...

continued safe dry storage of spent fuel, the NRC is further studying how the fuel and storage systems perform over time. The NRC is also staying on top of related research planned by the Department of Energy and the nuclear industry. What We Regulate and Why The NRC oversees the design, manufacturing, and use of dry casks.

The first-ever small modular reactor design approved by the U.S. Nuclear Regulatory Commission may now move, slowly, into the project phase that could offer carbon-free baseload power options for the future utility, commercial and industrial sectors. ... but also on-site resiliency projects such as microgrids, combined heat and power, rooftop ...

Horizontal storage system. A site-specific license allows a specific cask design to be used at a specific location and offers the opportunity for a hearing before the NRC grants the license.. A general license allows a reactor site to use any cask certified by the NRC, as long as the site meets the conditions specified in the certificate. The public can comment on cask ...

The NRC, the federal agency tasked with regulating nuclear energy in the United States, issued the license in 2021 to Interim Storage Partners, a joint venture of France-based Orano and Dallas ...

The NWPA directs the federal government to establish a permanent geologic repository for waste disposal. In the meantime, until such storage is available, the NWPA tasks the NRC and U.S. Department of Energy (DOE) with taking actions required to encourage and expedite the use of available storage space at the sites of

## Nrc energy storage

civilian nuclear reactors.

The staff of the U.S. Nuclear Regulatory Commission (NRC) is currently engaged in review activities for the construction permit application from TerraPower, LLC (TerraPower), on behalf of US SFR Owner, LLC (USO), a wholly owned subsidiary of TerraPower, for Kemmerer Power Station Unit 1 (Kemmerer Unit 1) to be located in Lincoln County, Wyoming.

Storage of Spent Nuclear Fuel Transportation of Spent Nuclear Fuel Research Activities. ... Advanced Nuclear for Clean Energy Act of 2024) ... It requires the NRC to take a number of actions, particularly in the areas of licensing of new reactors and fuels, while maintaining the NRC's core mission to protect public health and safety. ...

ISP Receives License from NRC for a Consolidated Interim Storage Facility for Used Nuclear Fuel . Andrews, Texas - Interim Storage Partners today announced today that the U.S. Nuclear Regulatory Commission issued its license for a proposed commercial consolidated interim storage facility (CISF) on September 13, 2021. ... Atomic Energy Act to ...

It is within this context that the National Research Council, through its Energy Storage for Grid Security and Modernization Program, has undertaken the development of a Canadian Energy Storage Study, with support from Natural Resources Canada, strategic partners and consultants, stakeholders across the value chain, and an expert advisory board.

Nuclear Security and Safeguards. The terms safeguards and security are generally used to describe programs that promote the common defense and security and protect public health and safety by guarding against theft and sabotage. The licensee security programs and contingency plans deal with threats, thefts, and sabotage relating to special nuclear material, ...

ADAMS Public Documents. The Agencywide Documents Access and Management System (ADAMS) is the official recordkeeping system, through which the U.S. Nuclear Regulatory Commission (NRC) provides access to the following "libraries" or collections of publicly available documents: . The Publicly Available Records System (PARS) Library ...

WASHINGTON, April 6 -- The Nuclear Regulatory Commission has issued a notice, published in the Federal Register on April 5, 2023, entitled "In the Matter of Susquehanna Nuclear, LLC; Susquehanna Steam Electric Station, Units 1 and 2 and the Associated Independent Spent Fuel Storage Installation."The notice was issued by Jamie M. Heisserer, deputy director in the ...

The Nuclear Regulatory Commission has asserted that it has authority under the Atomic Energy Act to license temporary, away from reactor storage facilities for spent nuclear fuel. Based on that claim of authority, the Commission issued a license for Interim Storage Partners, LLC, to operate a temporary storage facility on the Permian Basin.

## Nrc energy storage

TerraPower requests that the U.S. Nuclear Regulatory Commission (NRC) staff review and evaluate the subject white paper and provide feedback on the ... contains the thermal energy storage tanks, steam generator, feedwater system, condenser, turbine, and supporting balance of plant (BOP) systems. The EI is physically connected to the NI

Nuclear Regulatory Commission Exhibit # - APL000046-00-BD01 Docket # - 05200016 Identified: 01/26/2012 ... Bulk Energy Storage :Overview o Stored Energy can provide electricity during periods of high energy demand o Currently demonstrated with bulk energy storage systems such as Pumped Hydro Storage (PHS)+- 2.5% of USA installed base ...

NRC facilities Supports research and development in battery cell production, battery cell assembly and battery testing. The funding will enable the purchase of new equipment and the installation ...

The NRC regulates the storage and disposal of all commercially generated radioactive wastes in the United States. The NRC also regulates high-level wastes generated by the Department of Energy that are subject to long-term storage and not used for, or part of, research and development activities. Regulations establish minimum acceptable ...
