

Old residential areas can be equipped with solar panels

Are solar panels suitable for older buildings?

Older buildings often have unique characteristics that make installing solar panels challenging. The building's fabric, or the materials it's constructed from, may not make it easy to incorporate modern technology. In some cases, your solar panel roof suitability may not be right.

Can I install solar panels on a listed building?

You need Listed Building Consent before you can go ahead with installing solar panels on a listed building. Some heritage structures may not be suitable for solar panels if the installation would harm the building's significance, but many listed buildings can accommodate panels if fitted discreetly.

Are there alternatives to solar panels on listed buildings?

Alternatives include joining community solar projects, using smaller solar solutions like solar lights, or improving the building's energy efficiency through other means. Are there grants or financial support available for installing solar panels on listed buildings? Financial support options can vary.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Can solar panels be installed on a heritage building?

Some heritage structures may not be suitable for solar panels if the installation would harm the building's significance, but many listed buildings can accommodate panels if fitted discreetly. Panels should be placed in less visible areas, so installing them on a prominent roof slope is usually a no-no.
