This is a solar inverter which allows power to be switched from the DC power obtained from solar panels to the AC power needed to control the pump. With the renewable solar inverter, pumps can adapt to solar power sources rather than traditional electrical supplies or generators. Page 6: Product Overview Product Overview
1. PV input 2. AC output 3.

The solar inverter's primary function is to convert this DC electricity into AC electricity. Synchronization with Grid Power: In grid-tied systems, solar inverters ensure that the AC ...

All inverters supplied by Omega Solar+Batteries are weatherproof IP65 rated. They can hang on any external wall that is preferably sheltered from rain and direct sunlight. Extreme temperatures effect the internal operating components and may shorten their operating life. The inverters may be installed internally provided there is adequate air ...
