Here are the steps I followed to diagnose the charging issue with my Vax ONEPWR Lithium-Ion battery: 1- Obtain a multimeter and select the 20V DC (direct current) option from the available settings. Connect the multimeter's cable to the terminals on the right side of the battery and let the red wire touch the terminals on the left side.

I got this Onepwr 3.0 Ah lithium-ion battery complimentary in exchange for my honest review. I love how long this battery lasts for! The battery that came with my vacuum lasted only 30 minutes and sometimes I would have to recharge during a vacuum session. This new battery was able to last through 2 car vacuums in a one hour period.
