

# Outback power systems troubleshooting

Why is my Outback system not working?

If the system remains running with no errors, then the problem is most likely in the external AC wiring or equipment connected to it. With the AC output breakers still open, power down the Outback system by opening the battery breaker.

How do I power down the Outback system?

With the AC output breakers still open, power down the Outback system by opening the battery breaker. All the Outback equipment should now be powered off, along with all user equipment connected to the AC circuits in the camp. The next steps will require testing the AC circuits in the camp.

Who is Outback power technologies?

About OutBack Power Technologies OutBack Power Technologies is a leader in advanced energy conversion technology. OutBack products include true sine wave inverter/chargers, maximum power point tracking charge controllers, and system communication components, as well as circuit breakers, batteries, accessories, and assembled systems.

How do I test my Outback 240V inverter?

Both inverters would need to be running to provide 240V power. The first test is to try to eliminate internal faults in the Outback inverters and wiring. To do so, power down the entire system, then restart it with the AC output disconnected from the external loads. Open the two AC breakers on the output of the FX inverters.

How do I troubleshoot an inverter that is not producing output voltage?

To troubleshoot an inverter that is not producing output voltage or supporting your critical loads: Measure DC voltage at the inverter terminals (directly on the inverter). See your product's Spec Sheet to verify that this voltage is within the acceptable voltage window. See installation manual for the location of jumper J3.

Does the flexmax 80 work with Outback power systems mate?

The FLEXmax 80 is designed to seamlessly integrate with other OutBack components and can be remotely monitored and configured (up to 1000 feet) by the optional OutBack Power Systems MATE display (version 4.0.4 or greater). Please contact your renewable energy dealer/installer for assistance.
