How much does a solar panel cost in the UK?

The average cost of a solar panel in the UK based on a 350-watt panel is currently between £500 and £800. However, please bear in mind that this is the price for a single solar panel and does not include the professional installation or any other extras e.g. pigeon proofing. With that said, let's explore some common solar installation scenarios...

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. *kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.

How much does a solar PV installation cost per kilowatt?

The mean average cost per kilowatt of a small solar PV installation (0-4kW) is above £2,000 for the first time since these records began in 2013/14. Prices for larger solar installations (4-10kW) increased even more dramatically - by 31% since 2021/22.

How much does a solar panel system cost?

The average package 3kW or 4kW solar panel system with battery, usually comes with a 4kW to 14kW battery. The average price of a solar panel system and battery ranges from £8,500 - £14,000 but can be considerably higher depending on the battery. If you want to include a storage solution you are going to have to pay more upfront.

Are monocrystalline solar panels expensive?

The only downside of monocrystalline panels is the cost. They are by far the most expensive solar panel option, costing an average of £1 per watt. When comparing solar panel costs in the UK, it's important to weigh up efficiency vs costs, while considering your energy needs. For many, polycrystalline panels are the perfect middle ground.

What is the VAT rate on solar panels in the UK?

The UK government has implemented a significant incentive to promote the adoption of solar energy by introducing a 0% VAT rate on solar panel installations for residential properties. This tax relief, which came into effect on April 1, 2022, is set to continue until March 31, 2027.

With the average solar panel cost ranging from £400 for thin-film to £1,500 for monocrystalline per kilowatt and a standard 350-watt panel priced between £150-£300, the ...
