

What is solar panel insurance?

Solar panel insurance is cover that protects you from the financial blow of your system getting stolen, damaged, or destroyed in numerous specific ways. If you successfully claim on solar panel insurance, you'll get a payout to help you to repair or replace your system.

Does homeowners insurance cover solar panels?

Usually, homeowner's solar insurance packages cover all types of solar panels: monocrystalline, polycrystalline PV, or thin film solar panels. The insurance protects your solar rooftop against common risks, such as fire, hail, lightning, storm damage, or theft. The claim limit for solar panel coverage varies depending on the policy.

Do you need commercial solar panel insurance?

Comprehensive commercial solar panel insurance protects the investment if a business owns the panels. When solar panels are leased, the responsibility for insurance typically falls on the panel owner. The next key point revolves around the heightened liability risks associated with commercial solar panel systems.

How much does solar panel home insurance cost?

The annual cost of solar panel home insurance ranges from \$118 to \$152, which seems reasonable compared to the potential risks. Once you decide to install solar panels, inform your home insurer. Solar panels contribute to rebuilding your home's value, so it's important to list them in the insurance coverage.

Are solar panels included in buildings insurance?

Most providers include solar panels in buildings insurance, treating them as part of the fabric of your home, just like the doors, floors, and walls. However, these policies can be insufficiently comprehensive, unless you pay extra. This means you can often attain a better level of cover if you get solar panel insurance separately.
