

Photovoltaic panels flashing

Do solar flashing kits stop water from entering the roof?

These solar roof flashing kits, will stop water from entering into the roof when installing solar panels. These solar flashing kits go hand in hand with all of the K2 plain tile, slate, concrete, vario 1 and 2 solar panel rail fixing supports. Invest in these to eradicate any future maintenance costs in years to come.

What type of flashing is best for solar panels?

Our grey silicone flashing is designed for solar thermal applications, providing protection against hot pipes while blending seamlessly with the solar panel installation. Our black EPDM flashing is perfect for solar PV and cable penetrations.

What is a solar flashing kit?

Designed to prevent the ingress of water. These flashing kits go over the top of our solar roof fixings. Ideal for many roof coverings. Ask for details. We offer the flashing on its own + flashing kit or individual parts as required to protect every roof bracket entry point.

Which flashing kits work with Clearline pv16 solar modules?

Six simple flashing kits work with Clearline PV16 solar modules and are combined to create rectangular solar arrays of any size. Available in either portrait or landscape orientation. For more information see the Clearline fusion installation manual.

What is the best solar roof pipe flashing?

The Dektite Premium Solar roof pipe flashing boasts a flexible boot which can handle extreme temperatures with ease. Its square aluminium base is bendable, making installation simple for most roof profiles. Extremely effective at diverting standing rainwater, this is a must have for all your roof pipe flashing needs.

Do you offer roof flashing kits?

We offer these roof flashing kits to go with our on roof fixing kits, these are often purchased with module kit sizes from 2-16 solar panels. Make sure you apply your system correctly to the roof, do it once and your timbers will not rot. Never drill through any structure, use this method as a life time guarantee.
