

Photovoltaic panels installed in large flats

How much do flat roof solar panels cost?

Flat roof solar panels can cost between £2,800 - £12,100 for the average 2 to 3 bedroom house. Flat roof solar panels cost less in terms of labour costs since installation is easier (however this depends on your roof). One downside of putting solar panels on a flat roof is that they take up more space per kW.

Can you put solar panels on a flat roof?

One downside of putting solar panels on a flat roof is that they take up more space per kW. When considering what type of roof is ideal for solar panels, many often consider pitched roofs as the only option. Homeowners also often ask "Can you have solar panels on a flat roof?".

Should you install solar panels for flats & apartments in the UK?

Installing solar panels for flats and apartments in the UK can be a beneficial practice, especially if you are looking to cut down on your electricity bills. This is because solar panels have gotten more efficient and cheaper in the past few years allowing for many more types of homes to install them with ease.

How much does a solar panel weigh on a flat roof?

As mentioned earlier, solar panels on a flat roof need a heavy ballasted mounting system to stay secure in high winds. And that ballast can make a solar panel up to five times heavier than a typical non-ballasted panel. A ballasted solar panel can weigh around 100kg, whereas a non-ballasted solar panel is only about 20kg.

Are flat roof solar panels a viable option?

In reality, flat roofs are just as viable and can bring many unique advantages, being easier to maintain and offering a simpler installation process. Let's discuss the costs, benefits, and drawbacks of flat roof mounted solar panels.

Can solar panels be installed on a block of flats?

You can technically install solar panels on the wall of a block of flats, or even on the ground next to the wall. However, we usually recommend placing your solar panels on a south-facing roof, at an angle of between 20 and 50 degrees. Your panels will then be exposed to more sunlight, which will generate more electricity for you.

Solar panel installation can be expensive. To give you an idea, a standard 250W solar panel in 2022 costs £400-£500; however, it is not enough to power an entire home. A 3kW solar panel system --which is ideal for ...
