

Photovoltaic panels installed without leaking rain

Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.

Can solar panels be installed on a roof?

Solar panels are a popular choice for homeowners looking to reduce their carbon footprint and save on energy costs. However, installing solar panels on roofs can come with its own challenges and potential problems.

Can a flat roof hold solar panels?

This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels. Drilling into a flat roof can cause leaks, so an installer will usually ballast the panels instead - but these will add around 80kg per panel.

Can a UK roof support solar panels?

As long as your roof is pitched, has enough unshaded space, and doesn't contain spray foam insulation underneath, it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.

A bad solar panel installation might show itself through roof leaks that happen during storms, or ones that gradually increase over time without obvious signs. And remember, simply patching up the leak area isn't a long ...
