

Power companies charge solar owners

Should solar owners pay more than non-solar owners?

In addition to the reduction in compensation for excess energy, the PSC would have been allowed to consider rate schedules that include increased "fixed charges, including base facilities charges, electric grid access fees, or monthly minimum bills" in order to make solar owners pay more than non-solar owners.

Do utilities pay for solar panels?

In most states, utilities pay solar customers for power they send back to the grid. But there's a battle over what that sun-fueled energy is worth. Lynn Krell is unhappy with the reimbursements she gets from her utility company for having solar panels on her garage in Hattiesburg, Miss. Bryan Tarnowski for NBC News

How does PG&E pay for solar energy?

You're paid for your solar energy at close to the same rate as you pay for grid energy. When you use more energy than you generate during a month (called a "billing cycle"), your PG&E meter tracks how much you used from the grid. When you generate more energy than you use during a month, your meter tracks how much you sent to the grid.

Will Australians be able to charge Australians with rooftop solar panels?

Power companies will soon be able to charge Australians with rooftop solar panels for exporting electricity to the grid, under new rules introduced by the Australian Energy Market Commission (AEMC).
