Powerheads aquarium with power backup

IceCap Battery Backup v3.0 for Aquarium Pumps. When it comes to a power failure, it's not a matter of if, but when. Fish and corals can perish in as little as 4 hours without water flow. The IceCap Battery Battery Backup Version 3.0 will keep your flow pump running uninterrupted in the event of a power loss for ~35 hours*.

The vorTech power heads have a small DC plug on the bottom, if you get a DC power plug with wire lead that fits into that on amazon/ebay (can't remember the size), and connect it to a 12V batter, you will have automatic backup. One more item you need is a 12V battery charger that can charge and maintain the battery over time. Done.

I have read that the IceCap Battery Backup works with the Octo Pulse powerheads. My questions: 1.) Can the battery backup work even though the pumps are controlled via the Apex? 2.) When the power goes out, will the pumps just turn on full blast? 3.) My Octo Pulse powerheads are currently not pointed up for surface agitation.
