Similar to a solar PPA, a solar lease scenario also involves a third-party owner and can often be structured with no upfront cost. The primary difference between a PPA and a lease is that rather than pay per kWh used as you would in a solar PPA, you'll pay a fixed rate over the lifetime of the contract (typically 7-25 years).

A PPA is an agreement between a property owner and a solar installer, often in cooperation with a utility. Essentially, the solar company retains ownership of the system it installs on your ...

Solar power purchase agreements (PPAs) are a popular financing option for those looking to install solar panels on their roofs. PPAs allow you to install a home solar system on your roof with no upfront costs. Instead, you pay the solar company every month for every kilowatt-hour of solar energy the panels produce.

With a history of successful project development and funding going back to 2008, Kairos and its principals are among the oldest and most well-established solar PPA providers in Hawaii. We are very proud of having never failed to complete a project we have committed to.
