Who is progressive energy?

Progressive Energy has a wealth of experience of bringing together and managing consortium partners, working with large industrials and engaging closely with Government.

Why is progressive energy bringing green hydrogen to the UK?

"Progressive Energy is proud to be leading this consortium which we hope will bring the first large-scale dedicated green hydrogen production to the region." Producing home-grown green hydrogen is a key part in helping the UK to move to a more sustainable future and is a crucial part of the future energy mix.

Why is foresight partnering with progressive & Statkraft?

The partnership with Progressive and Statkraft constitutes Foresight's second hydrogen investment this year and first in the UK. "We are very pleased to be making this investment in the North West and we see an important role for hydrogen in the decarbonisation of industry.

Progressive Energy. The world's energy matrix is shifting, moving inexorably away from carbon-heavy sources and towards cleaner, more efficient technologies.
