

Under the Action Plan, Albania aims to increase the share of renewables in total output to 54% by 2030, including 490 MW of solar PV capacity as part of a broader 640 MW target for non-hydro ...

The reservoir of state-owned Electricity Generation Corp.'s Demirköprü hydropower plant is the first proposed area for Turkey's planned floating solar power auction. The YEKA support ...

The Emilia-Romagna Region in northern Italy is supporting the creation and strengthening of renewable energy communities (RECs) in five countries in the Western Balkans. Ten projects ...

A new 50 megawatt (MWp) solar photovoltaic plant will be constructed in Albania with 39.2 million euros in financing from the European Bank for Reconstruction and Development (EBRD) and ...

Under a CfD, the operator of a renewable electricity plant has a guaranteed price, approved through the auction. When the firm sells electricity in the market at a higher price, it must ...

Croatian oil and gas company INA and German energy giant E.ON's subsidiary in the Southeastern European country have signed a power purchase agreement for electricity from ...

Albania has secured funding for a major solar park in Belsh, set to supply clean electricity to over 16,100 households, Deputy Prime Minister and Energy Minister Belinda Balluku announced ...

These results provide crucial information for the renewable energy sector, distribution system operators, and prosumers. For the renewable energy industry, the study highlights the ...

Efficient renewables integration In the renewable energy segment, Hitachi Energy offers a range of substation solutions that help to efficiently integrate renewable energy into the transmission ...

Defic Globe, YEO's Istanbul-based joint venture with Emsolt Investments, acquired 15 Romanian project firms developing plans for power plants of 219 MW in total. The portfolio also brings a ...

According to data compiled by the CyprusGrid tracking platform, the island country curtailed more than 167 GWh of renewable electricity in the first six months of 2025. It was equivalent to last ...

This leaves it vulnerable to drought and climate change, with electricity imports needed during particularly dry years, sometimes covering up to half of total consumption. The Belshi project ...

The plant is expected to generate over 70GWh of renewable electricity annually once operational. It will
